

Functional Area	Name	Description	Type / ID	Risk (1-Lowest, 5-Highest)	Feature Type	Data Impact
Conditional Actions	Date compute is not waiting until all computations are complete to retrieve factor values	Computations involving dates and numbers were able to be thrown off if the user manually entered a value. Computations are now all run based on the order of the fields on the form, so one number can drive the next one after it.	Bug / 5046712818	2	Minor	None
Conditional Actions	Date populate no longer working	Date computes were no longer functioning based on a checkbox trigger due to a separate date/number compute in the previous version release. That has been fixed.	Bug / 5088631734	2	Minor	Form data display
Form Rendering	Table columns misaligned for larger normalized tables	Normalized tables now render better when checkbox fields are involved.	Bug / 4861162830	2	Minor	Form data display

Functional Area	Name	Description	Type / ID	Risk (1-Lowest, 5-Highest)	Feature Type	Data Impacte
Lab Ranges	Lab range configuration	Lab range configuration and validations now supported via iOS	Requirement / 2535205127	2	Minor	None
Payment Management	Payment Configuration	Payment configuration added in iOS	Requirement / 2535205281	2	Minor	None
Payment Management	Payments Manager	Payments manager added in iOS	Requirement / 5071424914	1	Minor	None
